

TUNAP PASSION CULTIVATES SUCCESS

Research, development, manufacturing and sales from one source: With this unique market position we present ourselves as a successful innovative technology leader. For years we have recorded increasing demand for our products and impressive company development. With our ideas and systems we bring lasting improvements to the commercial success of our customers. From business consultancy via technical product training to safe handling of chemicals, TUNAP provides a complete consultancy plan. Safety, environmental sustainability, cost-effectiveness and customer orientation are TUNAP GROUP's prime goals. Implementation of all these objectives will remain one of our most important challenges in the future.

For our **site in Singapore** we are looking for you as

APPLICATION ENGINEER (M/F) IN SINGAPORE (SOUTH-EAST ASIA)

YOUR TASK

Tunap Singapore seeks to recruit a self-motivated, hard-working and conscientious individual. You will be responsible for the recruitment and training of technical support personnel to an exceptional level within South-East Asia region.

Your area of responsibility will include, but is not exclusive to, handling of complaints, technical communications, the organisation and presentation of training. Furthermore, you will support the Managing Director and personnel responsible for Product Management and Technology. You will help to develop products and application technologies including any necessary documents and concepts. The successful candidate will be required to develop the strategic placement of products within the market as well as conduct training programs and demonstrations throughout the region in consultation with the Managing Director.

This role will develop by choosing, coordinating and evaluating the engineers for the region. The superior goal is the safeguarding of the technology and innovation leadership by multiplication and your own development to a Regional Engineer for South-East Asia. It also provides you with the opportunity to become the Head Application Engineer for the region South-East Asia.

You will be required to successfully complete 6 months training at our TUNAP headquarter in Wolfratshausen, Germany as preparation for the position in Singapore and the South-East Asia region.

THE REQUIREMENTS

- Nitec or higher Nitec (Light Vehicles) in Automotive Technology
- Able to repair / clean fuel injectors and air conditions for all well-known automotive brands
- Mid Level (more than 2 years of experiences in automotive repair)
- GCE "O" level
- A strong interest in motor vehicle engineering and design
- Excellent technical understanding of engineering applications
- Good analytical skills and an innovative approach to problem solving
- The ability to analyse and interpret data
- Good communication and presentation skills
- The ability to prioritise and plan effectively and able to work independently
- To be able to work as part of a team and take responsibility
- Possess Class 3 driving licence, applicants having Class 4 driving licence will have an added advantage
- Knowledge of basic computer skills
- Customer oriented with good interpersonal skill
- Excellent English and very good Chinese language skills are essential. Fluency in German would be desired.

LOOK FORWARD TO ...

a challenging job with multiple opportunities for professional growth and development as well as overall structural freedom. In addition, a trustworthy and friendly corporate culture in which talented individuals can feel at home awaits you. This is your opportunity to work independently and to help us shape our dynamic future corporate growth.
